Subject: RE: State of CA order lead battery recycling facility to suspend operations

Hi Everyone,

Thanks for your notes. I believe Tom is aware of the state's role in Exide, but he wanted just an update on EPA's role at the site. That said, I think it would probably be best if we limit the conversation to our role at both sites. Providing contacts for further follow-up at the state is a good idea, so if we have those available for a potential call tomorrow that would be great.

So far, I have the following people available for discussions on the sites:

Exide: Joel, Elizabeth

Rancho: Kay

Is there anyone else needs to be on the call?

If not, I can send out a meeting invite to Boxer's staff in a bit, but if we need to check on others availability here, I'll hold off on finalizing a time until they respond with their availability.
Thanks.

- David

I'm booked at 3 PM but can hold but 2 pm and 4 pm. I agree with Joel and think her staff should talk with the state agencies. My guess is that it would be hard to coordinate schedules for tomorrow but we can give her staff the appropriate contact people.

Thanks David, I'm available tomorrow afternoon for a call.

We could reach out to South Coast and DTSC to participate and cover the second bullet (and possibly) next steps, but they may not be available on short notice for a call Thurs.

Subject: RE: State of CA order lead battery recycling facility to suspend operations

Hi Everyone,

I recently spoke with Tom Bohigian, Senator Boxer's state director, who requested a single meeting to status updates on both the Exide and Rancho LPG.

For both sites, Mr. Bohigian has requested a general briefing on:

- EPA's past activity at the site
- EPA's (and any other participating agency's) current role in site activity
- Next steps and/or future actions

Both sites are a priority for Mr. Bohigian, and he has requested staffers from not only his office

(Fresno), but Boxer's Los Angeles office to be on the line for the call.

Boxer's office is available tomorrow in the morning, and in the afternoon from 3:00-5:00 p.m. I realize we have the all-hands tomorrow, so I'm thinking the morning's going to be a little tight, but would the afternoon be too little time to prepare?

Please let me know what your schedules are looking like and I will respond to Mr. Bohigian. If this week doesn't work, I can propose an alternate time for next week.

Thanks,

David
